

## **MEDICAL SERVICES AFTER HOURS**

### **After Hours Injury Triage**

Lakeside medical professionals are available 24 hours a day, seven days a week to provide telephone consults regarding work-related injuries. The medical professional will discuss the mechanism of injury and talk to the injured worker regarding their complaints and symptoms. The medical professional will then recommend appropriate action for management of the injury. This may include recommendations for first aid intervention and follow-up in a Lakeside clinic next business day, thus saving costly visits to emergency departments.

### **After Hours Drug and Alcohol Collection\***

Lakeside recognizes that not all accidents happen between 8am and 5pm, so we have made our collection services available 24 hours a day, seven days a week throughout Pinellas, Hillsborough, and Orange Counties. Certified drug screen collectors and certified breath alcohol technicians are on-call 24-hours per day, seven days per week to respond to the need for after-hours drug and alcohol testing. Certified staff is available to meet clients in a Lakeside clinic or at the employer's location.

### **After Hours Blood Borne Pathogen Exposure Management\***

Time is of the essence in managing blood borne pathogen exposures. Lakeside provides 24-hour coverage of a nurse practitioner and medical assistant who are experienced in the management of blood-borne pathogen exposures, including source blood testing. A Lakeside medical professional will provide telephone consult with the exposed person to determine the significance of the exposure, and the need for testing and intervention. If indicated, the medical assistant will meet your worker in a Lakeside clinic to obtain samples for baseline testing of the exposed worker and to run testing on source blood samples. The Lakeside nurse practitioner will then determine the need for post exposure medication that can be immediately dispensed from the Lakeside clinic.
